UCCS College of Engineering & Applied Science
UNIVERSITY OF COLORADO COLORADO SPRINGS

EAS Policy EAS-FAC-006

Subject	F&A Distribution
Status	Draft for review and approval
Effective Date	October 22, 2026
Supersedes	July 1, 2022
Approved	Dean Ying Shang, concurred by EAS Leadership Council

Introduction

UCCS Campus Policy 900-003, effective June 23, 2024, distributes 55% of total facilities and administrative recovery (F&A) to the college, school, center, or institute that attracted the sponsored award and performed the work. The remaining 45% is distributed by the campus to central research and support functions. This policy establishes how the College of Engineering and Applied Science (EAS) distributes its 55% share while maintaining the established allocations to principal investigators and departments.

Campus Distribution

Recipient	Percent of total F&A
Generating college, school, center, or institute	55%
Office of Research	17%
Administration and Finance	10%
Library	8%
Graduate School	6%
Executive Vice Chancellor for Academic Affairs	4%

EAS Internal Distribution

The following percentages are percentages of total F&A recovered. In each case, the allocations total the 55% distributed to EAS under UCCS Campus Policy 900-003.

Faculty appointment category	PI	Department	Dean	College research infrastructure and cost-sharing reserve	Total to EAS
First six years since hire	12%	12%	16%	15%	55%
Seventh year and beyond	26%	6%	8%	15%	55%

Conditions

EAS assumes 20% of technology-transfer costs and 100% of cost-share matching requirements attributable to awards allocated to EAS, consistent with Campus Policy 900-003.

For awards crossing college, school, center, or institute boundaries, the F&A distribution must be negotiated and documented before proposal submission.

A director of an EAS center will negotiate any F&A return to the center with the appropriate department chair and the dean.

Exceptions must comply with UCCS Campus Policy 900-003 and be approved in writing by all affected parties before proposal submission.
